

Release Paper Liners

Our release liner solutions are available with a wide range of features and technical properties and can be customized for various applications

ENABLING SUSTAINABLE
PERFORMANCE

Release Papers

- **Direct-coated paper LOPASIL®** : Release paper with direct silicone coating on one side or both sides
- **Poly-coated paper POLY SILK®** : Release paper with silicon coating on one side or both sides of the poly-coated paper.

We can customize release force, basis weight (grammage), coating weight, width, and packaging according to your product and processing requirements, and provide support for various types of printing.

Available papers:

- Clay-coated kraft - CCK
- Glassines- GLS
- Machine finished Kraft - MF
- Machine glazed kraft - MG

Markets served :

- Industrial
- Electronics
- Automotive
- Label
- Healthcare
- Tapes

LOPASIL® Glassines

LOPASIL® Glassines

Glassine GLS release paper is characterized by its density, uniform thickness, excellent internal strength, and good light transmission. It is widely used in various industries such as labels, tapes, industrial and medical fields, for both process materials and finished products.

BENEFITS

- ✦ High density, transparent
- ✦ Uniform thickness, good die-cuttability
- ✦ Environmental-friendly
- ✦ Good physical properties and high strength.
- ✦ Temperature-resistant

LOPASIL® Clay coated kraft

LOPASIL® CCK

CCK (Clay Coated Kraft) release paper has good stiffness, high smoothness, and high strength. It is generally used in applications where high requirements for paper strength, lay flat, and high heat resistance are needed.

BENEFITS

- ✦ Good stiffness and has a certain thickness
- ✦ Lay flat
- ✦ Environmental-friendly
- ✦ Good physical properties and high strength.
- ✦ Temperature-resistant

Grade	Color	Product Description	Release Force	Application
A3120BE	white	LOPASIL CCK - 120G W/CCK C2S	modify:tight	Composites; Aviation, tailor made

POLYSILK® Poly-coated paper

POLYSILK®

Poly-coated release paper typically has good dimensional stability and smoothness. POLYSILK poly-coated release paper offers customers a variety of options for single-sided and double-sided poly-coating and silicone application. The poly-coated surface can be embossed to a certain pattern, and it is used in fields such as advertising materials and industrial tapes.

BENEFITS

- ✦ Good stiffness and lay flat
- ✦ Good physical properties and high strength
- ✦ Offer various embossing patterns
- ✦ Moisture-resistant, dimensional stability

Grade	Color	Product Description	Release Force	Application
